

Home automation

Based on the values, experience, high-quality technology and design that have set us apart for over 20 years, we present you solutions for the **automation of homes, buildings and boats**: concrete, effective and innovative responses developed based on your personal needs and requirements.

MEZAB automation system respond to your every need. Simply.

Discover how we have managed to combine aesthetics with functionality, ease of installation with versatile application, and energy saving with outstanding performance. And if you get the impression that we have read your thoughts, don't be surprised: **MEZAB** does this and more. Simply.

Home control

With By-me protocol each room responds to your wishes: at any time, for any occasion or necessity.

Simply touch the Multimedia Videotouch display and in a few moments, for each room of the home, you can load one of 32 different temperature, lighting and comfort combinations, configured according to daily needs, special occasions, unforeseen necessities or pure personal pleasure

By-me talks to you: both in and out of the home. Communication knows no limits.

When you're at home you can monitor the whole system from a LAN or WI-FI network and, with the video touch screen and the door entry panels, nothing happening outside will escape your attention. When you are out you can dialogue with the home via the Internet from your computer, smartphone or latest generation tablet such as iPhone and iPad.

Nothing escapes you, the whole home is just a simple, intuitive touch away.

View the video cameras, answer the video door entry system, control the lights, automated devices and loads, activate scenarios and manage the sound system.

Simply select the various rooms in the home and control all the functions, from a single point.

Home Safety and Security

With By-me safety is at its maximum level: the entire home is under surveillance and you are free to enjoy peace of mind.

The control panel silently protects the whole home, watching over people's possessions and safety.

And from the monitor you can keep an eye on the children while they are sleeping or playing, at all times, without having to constantly stand over them

Gas leak detector and Interlocked socket.

Dedicated sensors will detect any possible gas leak or signs of a flooding event, activate an audible alert signal, send an alarm text message, and automatically shut off the leak to make the place completely safe.

In the event of an electrical overload, the sockets protect both the connected loads from the risk of short-circuit and overload, and persons from contact with live parts

Transponder reader

The transponder reader allow access to the premises only by cleared personnel: simply move the transponder card near to the reader and identification is instantaneous

Video surveillance

Designed to respond specifically to precise needs, **Elvox video door entry systems** offer **advanced functions** and making everyday life safer.

Elvox video door entry systems with IP technology offer a **wide range of products**, from entrance panels to indoor stations. All developed with the usual **attention to design**. The products with **IP** technology cover all functional and installation needs

By-alarm integration

Stand-alone and expandable with a wide range of devices, the system can also be integrated into By-me home automation, for continuous, diffused and intelligent control.

The burglar alarm system can be configured using the intuitive By-alarm Manager software or quickly and easily using the keypad

Energy Efficiency

With By-me no energy is wasted: the control is constant, the power distribution is intelligent and the savings are significant.

The **"Energy Guard" functions** monitors consumption in real time, assuring prompt information on the energy usage. The touch screen records precise information on consumption, both instantaneously and for a given time frame, and displays consumption logs to assure more aware energy use

Touch screen for power consumption monitoring.

Enables you to check the power consumptions of all household devices. Where necessary you can manually force a disconnection priority.

Devices preconfigured for a basic home automation

Intelligent solutions that can enhance your home.

The traditional system can evolve into a home automation one. The most requested scenarios, rolling shutter controls and lights are all within reach.
